

# Climate Change

Climate change is rising

Animals are dying

Ice is melting

Islands are sinking

All because of us!!

All we have to do is walk,  
run, cycle or scooter to school  
to stop ice melting and islands sinking

Stop smoking cigarettes

Give it up for good

Buy an electric car or use an  
electric train

That will also help our world a bit  
Deforestation is bad for us and  
our wild life

Animals dying because of loggers

All you have to say is Stop!
