

## Seasons of the Year

Spring is coming because the trees are blossoming.  
Pretty snowdrops grow where there was snow.  
Rabbits hopping without a care leaping through the spring air.  
Inside for hours because of April showers.  
Now its fun watching new born lambs learn to run.  
Gardens growing tall and small, beautiful colours welcome all.

Summer is coming because the sun is shining.  
Underground soil starts to boil.  
Maybe rain will come? Only joking everyone!!!  
Many splashes in the pool but play safe, don't be a fool.  
Every day getting hotter so we need to drink lots of water.  
Ready for the summer sun with my friends having fun.

Autumn is coming because leaves are falling.  
Underground soil stops to boil.  
TVs turn on because the sun is gone.  
Unbelievable amount of leaves fall from the trees.  
Many windy days come by so bugs stop to fly.  
Never will the world be gone but we should all be having fun.

Winter is coming because snow is falling.  
Ice will fill the puddles that chill.  
New woolly hat with bobble when you shiver it will wobble.  
Today the streets are covered in snow.  
Will it be there tomorrow?  
Every 25<sup>th</sup> of December baby Jesus we remember.  
Racing sledges down the hill with snow on my face it's such a THRILL!!!!
